

AI can support the work

Draft · translate · challenge · document

Evidence and people decide

Judge · justify · revise · take responsibility

The estimator comes downstream of the science.

OPENING CHAT PROMPT

*Which causal claim
in your current work
feels least defensible?*

Revisit it now.

Complete these two lines:

In _____, before I fit a model, I will
_____.

Evidence or revision trigger:
_____.

Write it down. If useful, post one line in the chat.

andystats.github.io/Instats-Aug-5-2026-seminar/modules/H/

01

Repeat

Blank roadmap and
next-study prompts

02

Audit

Accept, correct, or
reject with evidence

03

Reproduce

Data, DAG, code,
results + checks

04

Compare

Completed
roadmap after your
own attempt

One-minute feedback in the chat

01

Use

What will you try
first?

02

Question

What still feels
least defensible?

03

Improve

What should we
change?

Thank you for doing the hard part: making the assumptions visible.

Kathryn Morrison · Andy Wilson

With thanks to Robert Platt (guest case) and Auriane Journet (live-delivery support).

Data can deceive.

**Make every causal claim
leave an audit trail.**
